

AquaLounge, an "aquatic lounge" for a new way to enjoy water fun

Relaxation and conviviality : that's what offers AquaLounge, new concept developed by Ur'bain®, a young company from Toulouse, France determined to introduce users to the "lounge" like no other, a new art of living and a new way to enjoy the pleasures of the water ...

Luxury, calm and voluptuousness ...

A true piece of contemporary design, this "aquatic lounge" is above a living space for exchange : and what is more user friendly than relaxing with family or friends in a heated water, quiet, in a relaxing atmosphere or a drink.

In this "aquatic lounge", no noisy bubbling can mitigate calm and communication, no pre-molded up dictating a unique position, no noisy mechanism that can ruin the relaxation.

But rather a flat floor for total freedom of movement, indoor bench, voluntarily refined aesthetics and part "bar" glass, playing on the transparency of its wall and to lay the bottles and glasses.

The ergonomics of aquatic lounge has indeed been designed to break down barriers and foster exchanges between swimmers and outside.

A unique and ingenious system

The "aquatic lounge" has a tank of 316L **stainless steel** : healthy and robust, it is resistant to impact and corrosion. It can also adapt perfectly to the use of fitness equipment or aquabike for a sportier relaxation.

But the **undeniable innovation** of this product is its **installation process** : Ur'bain® has indeed based manufacturing its aquatic lounge on the need to install it anywhere, especially to be able to pass all the elements component with a single door in a challenging urban environment access (city terrace, small garden ...).

Ur'bain® has **developed and patented** a unique and innovative system of assembly of the sealed stainless steel tank, no welding on site. The aquatic living room can be installed on site without the hassle and stress of transport.

Noble materials

Stainless steel tank, glass walls and exotic wood : all combine to provide the aquatic lounge a high-end design, meeting all the needs of the most demanding users.

High density compact coating resistant to scratches, shocks, solvents, weathering, UV and withstand temperatures ranging from - 80 C to +180 C, tempered glass assembled in laminated 18mm safety equipment ... luxurious aquatic lounge integrates tastefully into the most different environments.

Two versions : AquaLounge and Allure

The aquatic lounge is also declined, for those who prefer opacity, in the version "**Allure**" without glass wall without bar but with 2 indoor benches.

A customizable, modular design to perfection

To meet every need, the aquatic lounge is available in **2 versions produced in different lengths** :

AquaLounge : 1 bench and 1 bar - available in 2 m wide and 4 lengths : 2 m, 2.60 m, 4 m and 5.2 m

Allure : 2 benches - available in 2 m wide and 4 lengths : 2 m, 2.60 m, 4 m and 5.2 m

With additional intermediate sections, the aquatic lounge can also be extended on request beyond 5.2 meters.

Each of the 8 registered designs can be customized with a choice of skins, textures and colors chosen from more than 90 finishes. Everyone will be able to find the atmosphere which suits them ! The installation above ground can even authorize personal and artistic decoration, scalable according to the desires ... then becoming the aquatic lounge a unique piece!

AquaLounge

Allure

A aesthetic choice

In order not to harm the aesthetics, the treatment system and water heating has been fully integrated in the inside bench. No machinery is visible.

The aquatic Lounge offers a **beautiful retractable scale** (*registered design*) inspired water sports : its large exotic wooden steps are covered when not in use and in particular for improved child safety. This scale stainless steel, corrosion resistant, incorporates the skimmer, vacuum system and water filtration. The design is in there !

A french manufacture

The aquatic lounge is 100% designed and manufactured in France. It is made of materials 100% recyclable.

For indoor or outdoor

To each his desires and needs : the 2 versions of the aquatic lounge offered by Ur'bain® can be installed in a small space inside the house and outside, in a salon, but also on a terrace or in a small garden. Their above ground design allows to consider their installation in all environments.

Inside or outside, this aquatic lounge will find its place everywhere and allow everyone to enjoy the pleasures and benefits of water, in full quietude.

Price : from 23 000 € TTC

Ur'bain - 134, rue des Fontaines 31300 - TOULOUSE - www.ur-bain.com

The leaders of Ur'bain® 

Eric Aubrun and **Sébastien Claveau** are the founders of Ur'bain® young Toulouse company behind the marketing of aquatic lounge.

Building professional and specialist in projects management for one, engineering training for the second, they decided to put their complementary experience and shared taste for challenges for development of a company dedicated to the success .

They explain with passion behind their adventure : *"We left the observation and analysis of the behavior and user expectations : relaxation, wellness ... this is what people living today are looking especially in urban areas, in a society still moving when the rhythms of work and travel promote stress and fatigue.*

Nobody can now challenge the immense benefits that water brings and increasing attendance aquatic centers is a witness. Our aquatic lounge is a unique way to promote relaxation, exchange and sharing. »

"The urbanization of lifestyles and optimization spaces have led us to propose a beautiful product, easy to install, even in limited areas, and fits perfectly in the trend. »

The aquatic lounge is for Ur'bain® the result of a long development phase leading to high product range fully buildable site on which soil-tractor design avoids binding construction phases, as is the case for a traditional swimming-pool for example. This is the culmination of a successful technological research that has been the filing of a patent.

100% French manufacturing, the 2 versions - AquaLounge and Allure - are dedicated to the use of individuals but also find their place in tourist residences, hotels, guest houses, villas ... giving them a real added value throughout where the key words are relaxation, aesthetics and usability.
